

# Data Description

We need the following datasets to solve our problem:

1. Pincode (zipcode) of the neighbourhoods of Kochi. This can be obtained from <http://pincode.city/india/kerala/ernakulam/kochi>.
2. Latitudes and longitudes of various neighbourhoods in Kochi. By using GeoPy <https://github.com/geopy/geopy>, we can find out the required coordinates.
3. Infrastructure details of neighbourhoods in Kochi. We can use Foursquare API for this purpose.
